- GitHub

Full-Stack Developer

Personal Projects | Remote

05/2021 - Present

- Designed and built a crypto application called CoinBull where users can browse over 200+ different cryptos with a variety of helpful metrics, dynamic charts, add coins to their favorites, and view latest news. Worked on CoinBull with a team of 4 and had a primary focus on UX / UI, data streams, and API calls.
- Built a social platform called RWP which was geared towards developers where they can create accounts, make Reddit style posts / comments, view developer jobs, and see industry data. Worked on a team of 3 where my main focus was building out the database, data visualizations, and leading the team using Agile methodology.

Marketing Intern

Peapod | Chicago, IL

05/2019 - 08/2019

- Completed 4 vital projects; Omnichannel associate discount for all Ahold US brands, in-depth competitive landscape analysis, partnered with Edelman to create a brand refresh for Peapod, & helped orchestrate Midwest events for the summer of 2019.

Business Intelligence Analyst ADUSA Supply Chain | Remote

05/2020 - Present

- Responsible for producing insightful driven reports and metric dashboards with the help of SQL, Power Bi, and Excel.
- Strong focus on developing and tracking operational metrics for our two e-commerce channels store pick-up and delivery.
- Combing through granular level data to extract high-level insight to provide our brands with the tools needed to procure better business for the people who matter most, the customer.

Commercial Services & Strategies Intern Peapod Digital Labs | Chicago, IL

12/2019 - 01/2020

- Completed a productivity project for each US Ahold brand for both delivery and store pick-up channels to gain better understanding of where's there's room for improvement to better serve our customers
- Revised various metrics logic to influence more accurate data for business needs.
- Incorporated technological and strategic advances to optimize logistics for successful operations.
